"Process Tempo is a next-gen Decision Intelligence platform designed for the modern enterprise. It helps organizations overcome complexity by providing stakeholders the tools and insights they need to make clearer, smarter, data-driven decisions. The platform offers a comprehensive set of data science, data engineering, and data analytics features combined into a single platform that is easily configurable using a business-user friendly, drag and drop interface. The platform also empowers stakeholders with embedded forms and workflow capabilities, allowing them to take immediate action when a problem is discovered. When deployed, Process Tempo's combination of features help supply chain leaders to converge people, process and data across the entire supply chain."
